

ANGLERFISH LIGHTING SERIES

Experience true color with our

sunlight spectrum LED light

Anglerfish – SL1 200DNA

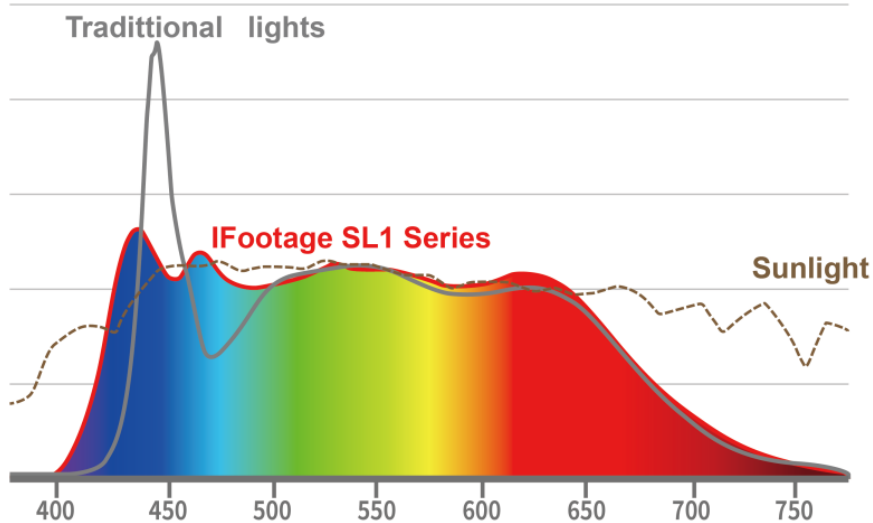

NATURAL SPECTRUM LIGHTING
ILLUMINATE YOUR WORLD WITH
NATURE'S COLORS

Our vision for the future is to empower every creator with their own personal "sun," enabling them to unlock greater creative potential in a natural and healthy environment.

EXPERIENCE TRUE COLOR WITH
LOW BLUE LIGHT TECHNOLOGY

Discover the power of low blue light technology and unlock the full potential of color rendering. Our cutting-edge technology reduces blue light, resulting in a heightened color rendering experience across the entire color spectrum. From vibrant blues to every color in between, our technology produces exceptional results that are sure to impress.

ANGLERFISH

UPGRADE TO LOW-BLUE-LIGHT LEDS FOR HEALTHIER LIGHTING

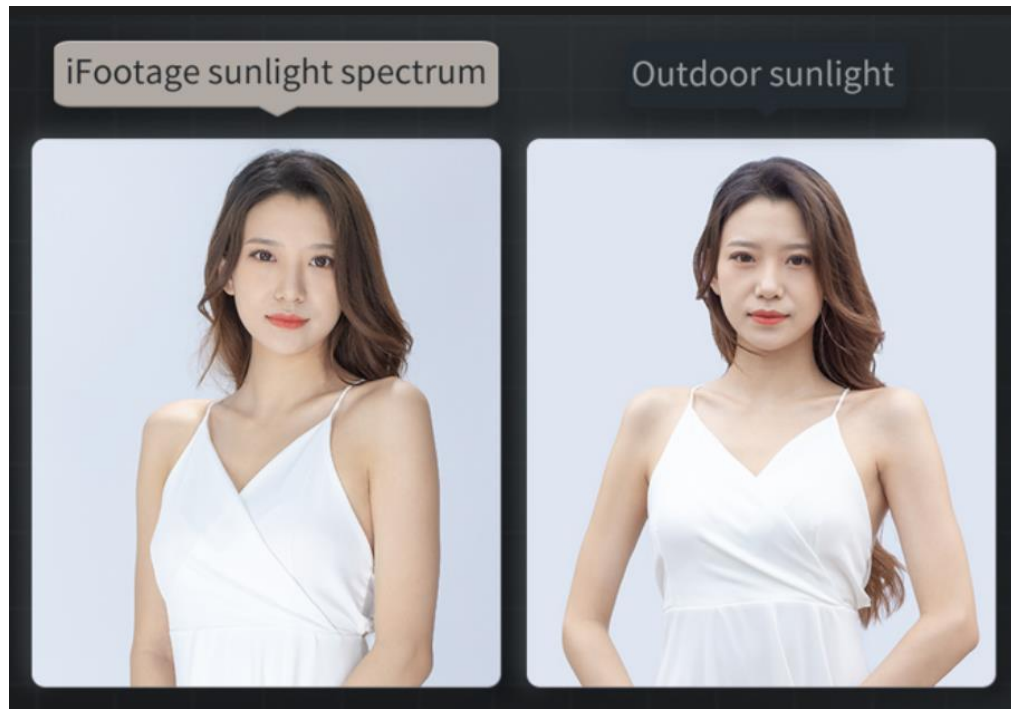

Say goodbye to eye strain and discomfort with our low-blue-light LEDs!

Our technology emits less blue light than other brands, so you can use them for longer without any negative effects. Plus, our LEDs reduce the harmful effects of blue light, keeping you healthy and happy.

ANGLERFISH

LIFELIKE SKIN TONES WITH **NATURAL SPECTRUM LIGHTING**

Say goodbye to the harsh, artificial lighting that causes unnatural skin color casting and hello to beautiful, lifelike skin tones.

Perfect for photography, videography, and any other visual applications, our natural spectrum lighting will help you capture stunning visuals every time.

ANGLERFISH

TRUE-TO-LIFE COLORS WITH **ACCURATE RENDERING TECHNOLOGY**

Tired of wasting hours on post-production color correction? Our cutting-edge LED lighting technology boasts powerful color accuracy, saving creators like you valuable time and allowing you to focus on your creative vision. With our technology, you can rest assured that your colors are true-to-life and vibrant, eliminating the need for extensive post-production work.

LIGHTING MODELS COMPARED

SL1 200DNA

SL1 220DN

SL1220DN features a separate controller lighting design for more flexible and free operation, while SL1 200DNA has an all-in-one lighting and control design, making it suitable for on-the-go use.

LIGHTING MODELS COMPARED

SL1 200DNA

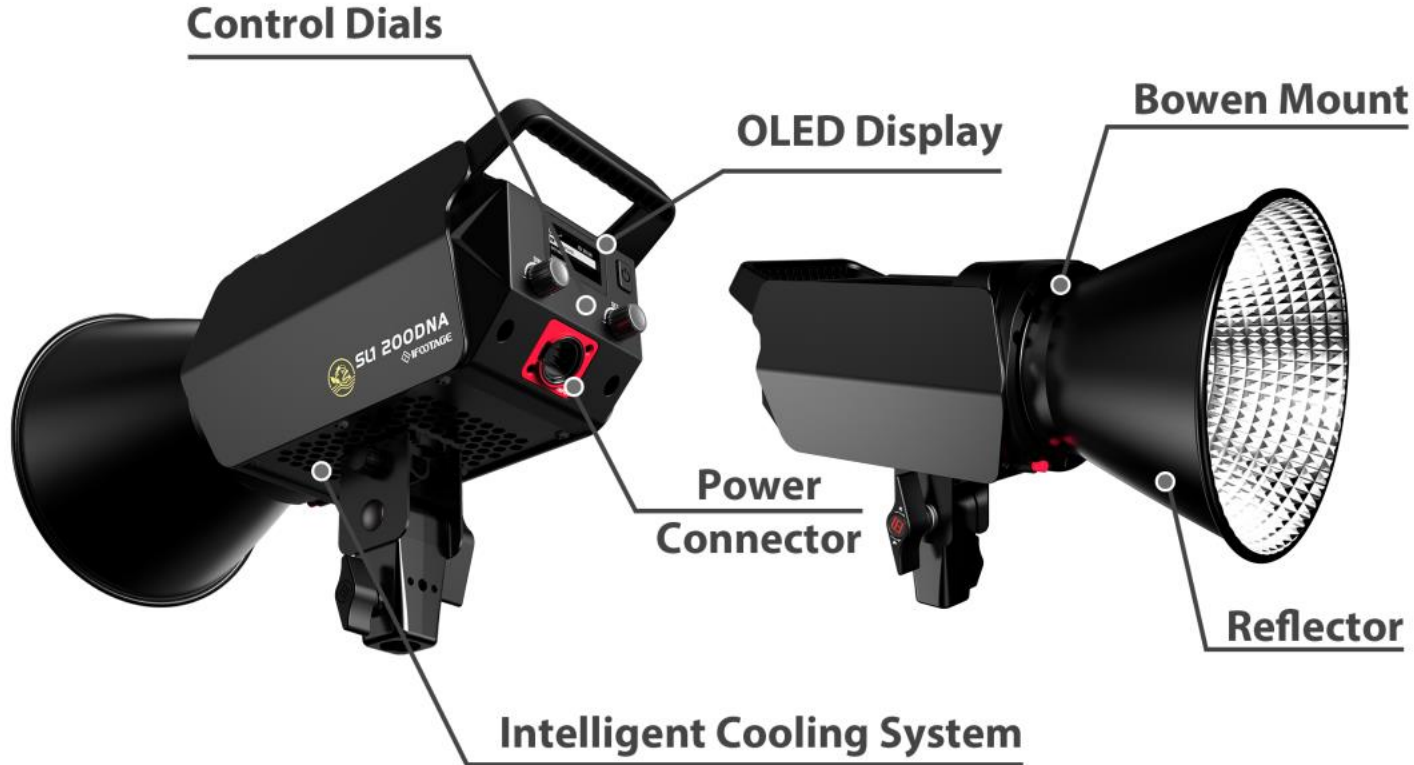

Thanks to its lightweight design, the overall weight of the product is significantly reduced, making it much easier to carry and transport without sacrificing functionality or performance.

SL1 220DN

When the light is positioned higher up, the SL1 220DN's separate controller comes in handy, allowing for easy operation and precise adjustments with its multiple function buttons and knobs. Plus, with DMX functionality, this light provides even more versatility and control options.
