

Productname: camRade travelMate 360

SKU: CAM-TM-360

EAN: 8718591673146

Resistant against:

Description

The travelMate 360 is created to carry on board most airplanes and fits the overhead compartment. If room is limited, the rotating wheels with a 360° radius can be detached to minimize the outer measurements of the bag. Strong but lightweight padding allows this bag to carry cameras with a maximum length of 45 cm/ 17.7 inches.

On the front, a separate compartment is added to store your laptop or tablet. Various pockets and slits on both the inside and outside of the bag help you store and organize several smaller items like documents, memory cards, cables and tools.

The soft-padded interior includes removable dividers with extra wide hook and loop fasteners for better adhesion to the fabric. This makes it easy to arrange the main compartment into sections to fit to your personal requirements.

Some of the smart gimmicks added to these bags are the straps on the side of the main compartment flap to prevent it from falling open, and a complimentary LED light with motion sensor that lights up as soon as you open up the bag!
