## Power up

The Atomos CONNECT can be powered by the DC Power Supply and Battery Eliminator that were supplied with your NINJA V / V+, or alternatively you can use compatible batteries. Connecting a power source to the CONNECT supplies power for both NINJA V / V+ and CONNECT.

### Battery

To connect a compatible battery, place the battery in front of the retaining lug, align with the connectors and slide the battery into the slot until it clicks into place.

ⓘ **Ensure NP-F / L-Series type batteries.**

Tapping the battery icon in the top right of your NINJA V/V+ screen will allow you to accurately see remaining battery life. Refer to the NINJA V/V+ User Manual for more information.

### Battery Eliminator

To connect the Battery Eliminator, follow the same procedure as the battery and lock it into position. Once the Battery Eliminator is in place, secure the DC power supply to the DC jack.
