

# Tuffpak®

The perfect case for your tripod

CAMERA SUPPORT  
GRANDERATH

These features have made a Tuffpak the world standard for safe transport of valuable camera support systems :

- Octagonal Shape helps prevent cases from rolling off car seats, airport baggage conveyor belts and inclined surfaces.
- Wheels for most models: Makes transporting tripods as easy on your back as it is on your equipment.
- Protected and Recessed Handles: Increases storage space, decreases shipping dimensions and makes damage to protruding handles a thing of the past.
- Rotationally Molded Construction: Eliminates seams and welds and increases wall thickness at all bends. A construction which not only makes Tuffpak the toughest case in the industry, it allows Tuffpak to offer the toughest warranty in the industry!
- and the most valuable feature of all...Experience: For nearly three decades, wherever news is made, Tuffpak has assured the safe arrival of valuable support systems to all corners of the globe. In the US, nearly every major production or rental house has made Tuffpak a standard part of their inventory.

With CaSu the Tuffpaks are finally available in Europe.

## Conclusion:

Nothing insures better protection for your tripod than a Tuffpak. If you absolutely, positively, have to arrive at your next shoot ready to go, there is no substitute.

## Examples:

Placing a tripod system on a plane in just a canvas bag is a gamble.

Tuffpak takes the weight off your mind on the plane and the wheels take the weight off your back when you arrive.

On tripod systems with a 150mm bowl - such as Video 25, Vision 250, C20/40 - heads are usually not separated from the legs for transport.

These are the times when you will most appreciate the superb quality, high strength, light weight and all the other features of a Tuffpak case.

model code no.	transport length (cm)	for tripod system lenght of - to (cm)	typical use
187400	80	74 - 84	2 stage 75 mm tripod with head (Vinten, Panther)
189100	103	91,5 - 104	2 stage 75 mm tripod with head (Sachtler) <b>or</b> 1 stage 75 mm tripod with head (Vinten)
181040	115	104 - 117	1 stage 75 mm tripod with head (Sachtler, Panther)
