

Spotlight Max 50° Lens Data Sheet

Main Features

- 50° Wide-Angle Projector Lens for Spotlight Max
- Optimized for High-Powered LED Fixtures
- Custom Precision Optics With Minimal Chromatic Aberration and Color Shift
- Efficient Light-Blending Optical Design for Compatibility with Full-Color Fixtures
- Telecentric Element Groups for Even Edge-to-Edge Light Distribution and Minimal Distortion of Illumination Circle
- Durable All-Metal Build
- Included Protective Soft Case

Spotlight Max 50° Specifications

Dimensions	20.5 x 19.9 x 24.7cm 8.1 x 7.8 x 9.72in
Weight	3.92kg / 8.64lbs

Product Description

The Spotlight Max 50° Lens is a wide-angle projection spotlight lens designed to be used with the Spotlight Max.

With custom precision optics, the Spotlight Max 50° Lens efficiently concentrates and blends light into a single wide and clean beam while maintaining its light source's color accuracy and mitigating chromatic aberration. In addition, the 50° Lens intensifies its light engine's output and increases the throw of the fixture, allowing subjects to be illuminated from far distances.

The use of telecentric optical elements in the 50° Lens and the Spotlight Max ensures that the difference of the output field angle and beam angle are minimized, resulting in an illumination circle with even edge-to-edge light distribution without hotspots.

The Spotlight Max 50° Lens comes in a protective soft carrying case, making transportation and storage a breeze.

Target Audience

The Spotlight Max 50° Lens is a powerful projection lens ideal for Spotlight Max users and owners looking to achieve a wide and intense beam of light with a long throw using high-output Bowens mount fixtures.

Users who require highly color-accurate light projections and evenly-lit illumination circles will appreciate the custom precision optics in the Spotlight Max 50° Lens that maintains the color accuracy of its light source as well as minimizes chromatic aberration.

The Spotlight Max 50° Lens offers stellar optical performance and a practical projection beam angle with excellent throw, making it a crucial addition to Spotlight Max users' kits.
